

Yassir AI Market Challenge

Personalizing the Market Experience with AI

Build intelligent recommendation systems that transform how customers discover products

Welcome to the Future of E-Commerce in Africa

Who is Yassir?

Yassir is the leading Super App in Africa, providing seamless solutions across multiple services

Ride-Hailing

Safe and reliable transportation

Delivery

Fast last-mile delivery solutions

Payments

Secure digital payment platform

Market

Online grocery & marketplace

Yassir Market

Your Daily Essentials, Delivered to Your Door

- ✓ **Fresh Groceries** - Quality products from trusted vendors
- ✓ **Same-Day Delivery** - Fast delivery across cities
- ✓ **Great Prices** - Best deals and exclusive offers
- ✓ **Personalized Experience** - Smart recommendations for you

The Challenge

Build an intelligent **recommendation system** that:

- Predicts which products customers will purchase
- Personalizes the shopping experience
- Increases customer engagement and satisfaction
- Drives sales and customer lifetime value

What is a Recommendation System?

A recommendation system predicts which products a customer is most likely to purchase based on:

- **Past behavior** - What they've bought before
- **User patterns** - When and how often they shop
- **Similar users** - What customers like them prefer
- **Product relationships** - Which products are bought together

Recommendations Types

Collaborative Filtering

Recommend products based on similar users' preferences

"Users like you also bought..."

Content-Based

Recommend similar products to what users have liked

"Similar to your favorites..."

Hybrid

Combine multiple approaches for better results

Context-Based

Use time, location, and behavior patterns

Your Dataset

387,580 order records, Containing real customer purchase history from Yassir Market

Key Features:

- **order_id** - Unique order identifier
- **product_id** - Product purchased
- **user_id** - Customer identifier
- **category** & **sub_category** - Product classification
- **order_day, order_hour** - Purchase timing
- **reordered** - Whether product was repurchased

What You'll Build

Product Recommendations

Which products each user will buy next

Reorder Prediction

Predict repeat purchases and timing

User Segmentation

Identify customer behavior patterns

Business Metrics

Calculate impact on revenue and engagement

How We'll Judge Your Solution 🏆

Accuracy (40%)

Model evaluation (Kaggle leaderboard)

Innovation (15%)

Unique approaches and creative solutions

Insights (20%)

Business understanding and user behavior analysis

Presentation (25%)

Clear communication of your solution

How to Submit

Platform: Kaggle Competition

Dataset: Available in competition page

Task: Predict products each user will purchase

Deadline: Check Kaggle for exact dates

Link: Your Kaggle competition URL

✓ Submit predictions via Kaggle leaderboard

✓ Present your approach and insights

Tips for Success

-  Explore the data deeply - Understand user behavior patterns
-  Feature engineering - Create meaningful features from the data
-  Try multiple approaches - Collaborative filtering, content-based, ensemble methods
-  Iterate and improve - Kaggle allows multiple submissions
-  Think business-first - How will your model create real value?
-  Communicate your findings - Tell the story of your solution

Let's Build the Future
